**Subject:** RE: I-70 East requests for information

Kirk – Thanks. I've copied 3 other folks at EPA that should be aware of this arrangement.

- Jennifer Chergo works in Community Relations at EPA and is assigned to the VB/I-70 Superfund Site. She is very familiar with the work at VB/I-70.
- Robin Coursen works in the NEPA group at EPA.
- Steve Wharton is my supervisor in Superfund at EPA.

As I mentioned, we have conducted some initial GW investigation work at Operable Unit 2(OU-02) at the VB/I-70 site and plan more GW investigation work. OU-02 is the area around the Denver Coliseum. You mentioned that CDOT would be installing some storm sewers for the City as part of the I-70 improvement project and would be doing some hazardous waste investigation prior to this work. We agreed that we should coordinate our investigation efforts where possible.

I look forward to hearing from you when you are ready to begin the planning effort.

**Subject:** I-70 East requests for information

Paula,

Per our phone conversation this morning, I am going to request that all requests for information come to EPA through myself, Carrie Wallis at Atkins, or Scott Epstein at Pinyon Environmental, for any project needs. Feel free to pass this message on to any other EPA staff you feel should be aware.

Thanks for your call, and I look forward to working with you and your agency in this critical part of the region.

Kirk
